EXPERIENCE

Dyte — *Backend Developer Intern*

Sep 2021 - Present

Typescript-WebRTC

Working on company's main backend in typescript

Appointy — *Backend Developer Intern*

Feb 2021 - July 2021

Golang-gRPC-GraphQL-CodeGen

Responsible for working on the company's backend in golang, added features like complete paypal integration for third-party vendors to take benefit of all features provided by paypal, internal code generation tools, ical feed services and other misc tasks.

Winuall — *Backend Developer Intern*

October 2020 - March 2021

Golang-Mongo-Node

Responsible for developing the company's marketplace(Online Learning Platform for independent/established tutors to students) backend and surrounding infrastructure. Worked with mongodb as a primary database. Languages used were golang for almost all tasks and some small node microservices.

Eventbeep — *Mobile Application Developer Intern*

April 2020 - June 2020

Flutter-Graphql-Hasura

My role as a flutter developer was to add features as well as shift the company's current faculty app's architecture to clean architecture following test and domain driven design principles.
